

Addition & Subtraction

Addition

Subtraction

Time for mental calculation

When you gotta work it out in your head

No time for hesitation

Addition

Ohhhh!

Subtraction

Ohhhh!

There's more than one way to do it

When you gotta work it out in your head

You'll find there's nothing to it

Try counting on or counting back

It's a great little trick once you've got the knack

Imagine 30 plus 210

Start with the largest number and then

Count on in tens

Come on, do it with me

220, 230, 240

If you want to double check then you can count back

Now that's what I call a mathematical hack

Addition

Subtraction

Time for mental calculation

When you gotta work it out in your head

No time for hesitation

Addition

Ohhhh!

Subtraction

Ohhhh!

There's more than one way to do it

When you gotta work it out in your head

You'll find there's nothing to it

Use your knowledge of number facts

And you'll have 43 plus 17 cracked

You know that 17 plus 3 makes 20

See

So that's 40 plus 20

Boom 60!

What about 70 plus 75

At first glance

Ooh, man alive!

But if you know double 70's 140

Then add the 5

145

Sorted!

Ohhhh!

**There's more than one way to do it
When you gotta work it out in your head
You'll find there's nothing to it**

**Partitioning is a good form of attack
Split the numbers to make it easier to subtract
Try 71 take 34
Here's what you do first of all
Take the 30 from the 71
You know that it leaves 41
Now subtract the remaining 4
37 is the answer that you're looking for**
