

Rounding numbers

**Hey! Hey! Rounding a number (x3)
To the nearest ten, hundred or thousand**

**Rounding a number
Keeps it close to its value
Rounding a number
Makes it easier to use
Rounding a number
Up or down
How do you choose?
Rounding a number
Remember these simple rules:**

**Down
If it's 0, 1, 2, 3, 4
Up
If the value is 5 or more**

**Hey! Hey! Rounding a number (x3)
To the nearest ten, hundred or thousand**

**Rounding a number
To the nearest ten
Let's see
Rounding a number
Take the number 83
Rounding a number
Check the 'ones' column value
Rounding a number
Can you remember what we do?**

Check the 'ones' value
Well, that is a 3
That is less than 5
So down we go, to 80!

Hey! Hey! Rounding a number (x3)
To the nearest ten, hundred or thousand

When rounding to the nearest hundred
The rules are just the same
But it's the tens column you're looking at
So here we go again...

Rounding a number
384
Rounding a number
It's the tens column you're looking for
Rounding a number
That's number 8 we can agree
Rounding a number
So which way is it going to be?

8 is more than 5
That's clear to everyone
So we go up to 400
Thank you
Job done

Hey! Hey! Rounding a number (x3)
To the nearest ten, hundred or thousand

When rounding to the nearest thousand

**You've guessed it
Just the same
But check out the hundreds column here
And play the Rounding game**

**Rounding a number
3965
Rounding a number
You know the rules
Let's have a try
Rounding a number
In the hundreds column
We have a 9
Rounding a number
Apply the rules one more time**

**9 is bigger than 5, that's true
Round up to 4000 is what we do**

**Hey! Hey! Rounding a number (x3)
Hey!**
