

Length and Height

Some things are big

Some things are small

Some things are long

And some things are short

Big! (Big!)

Small! (Small!)

Long! (Long!)

Short! (Short!)

Grab your tape measure

Measure them all!

Start from zero!

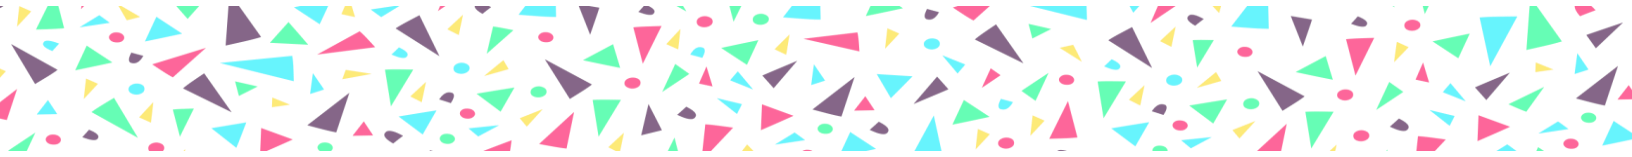

A metre is long

As long as a desk

Try measuring yours

Put it to the test

Now try a pencil

They are quite short

Use centimetres

Mine's 24

Centimetres!

Some things are big

Some things are small

Some things are long

And some things are short

Big! (Big!)

Small! (Small!)

Long! (Long!)

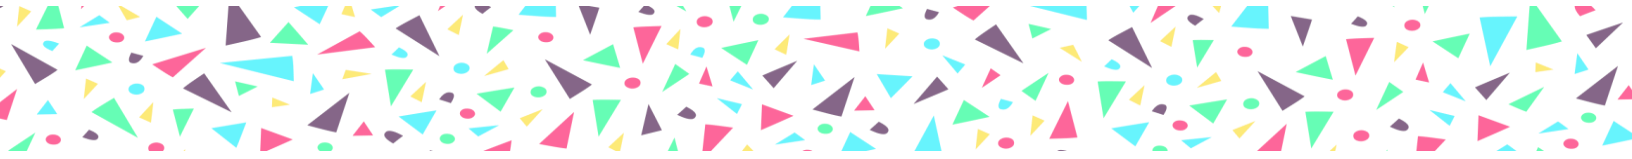

Short! (Short!)

Grab your tape measure

Measure them all

Start from zero!

Imagine a giant

As tall as the sky

Measure in metres

50 metres high!

Or down on the ground

Look at your shoe

Use centimetres

Mine's 22

Centimetres!

Some things are big

Some things are small

Some things are long

And some things are short

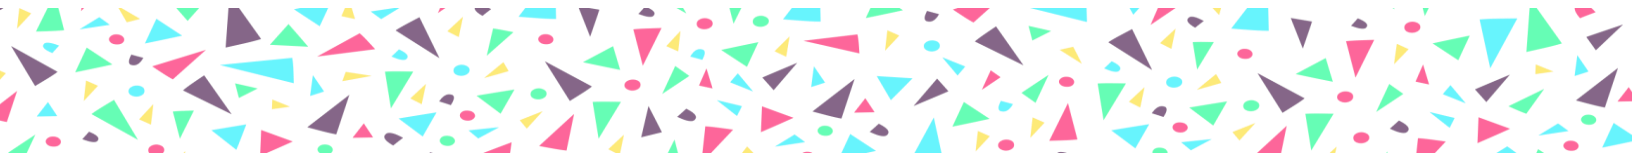

Big! (Big!)

Small! (Small!)

Long! (Long!)

Short! (Short!)

Grab your tape measure

Measure them all

Start from zero!

Now have a guess

At things you can see

How tall is that dog?

How high is that tree?

A house is much taller

Than you or me

But we are much longer

Than a buzzy bee

Big! Small! Long! Short!

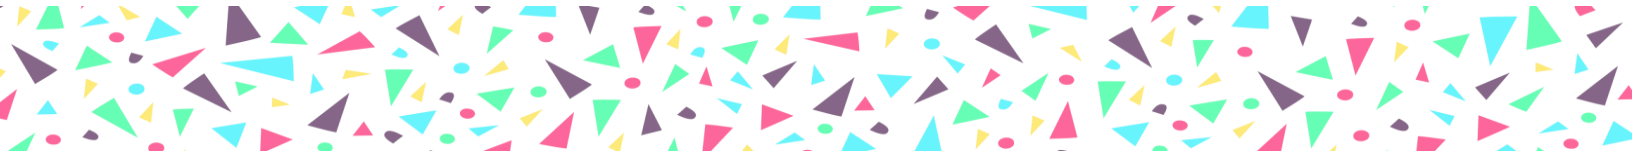

Some things are big

Some things are small

Some things are long

And some things are short

Big! (Big!)

Small! (Small!)

Long! (Long!)

Short! (Short!)

Grab your tape measure

Measure them all

Start from zero!

Big! Small! Long! Short!

(x2)
